Objective

I aspire to participate in and contribute to the company's projects in order to build fast and stable software. I am committed to learning and improving my programming skills. Additionally, I plan to further study AWS cloud computing services in the future to enhance my knowledge and better serve in my role.

Skills

- Programming languages: Javascript, Typescript
- High self-learning ability and discipline
- Comprehending English documents
- Unit testing
- Front-end (ReactJS): using TailwindCSS, AntDesign libraries
- Back-end: having knowledge of popular frameworks such as ExpressJS, NextJS, NestJS.
- Database management system: SQL (MySQL, PostgreSQL), noSQL (Mongodb)
- AWS (EC2)

Education

2019 - 2023

Sai Gon university

Software engineer

Current cumulative GPA 2.90

Honors & Awards

2021

Encouragement scholarship for the first semester

2022

Encouragement scholarship for the first semester

Projects

Forum API

Developed using TypeScript and the NestJS framework, independently designed APIs and database structures. Verifying API functionality through testing with the Postman and documented the APIs using Swagger.

Features:

- View, filter, paginate posts, notifications
- Upload, delete posts, comments
- Post, comment interacting
- Update profile information
- Authentication, authorization, limit user permissions
- Roles, role's permissions
- Account verification with email
- Basic notification system
- Unit Testing
- Deployed on AWS EC2

Technologies:

- NestJS
- TypeScript
- PostgreSQL
- AWS EC2

Sneaker Store Website

UI referenced from other shopping websites, developed using NextJS framework.

Features:

- View, search, filter products by price, categories, brands
- Using cookie for storing and updating user cart

Technologies:

- NextJS
- TypeScript
- AntDesign
- Mongodb
